Destiny[®]

Dianella tasmanica 'TAS100' 

An ornamental variegated Flax Lily distinguished by its compact, striking foliage.

Destiny grows to a height and width of 35cm and is ideal as a foliage plant for mass planting and accent gardens.

It is versatile as a specimen in a pot or patio application. Destiny grows in most soil types and tolerates moderate shade to full sun. Plant Destiny in a well mulched garden. Fertilise with a slow release fertiliser in Spring. Remove older leaves annually to keep the plant at its best. Water as required to keep healthy. Destiny is relatively drought tolerant, and very frost tolerant.
