

Emerald Arch®

Dianella tasmanica 'DT23' 

An ideal choice to create a tropical feel in a landscape, using a very cold hardy plant.

Emerald Arch is an ornamental Flax Lily distinguished by its majestic arching leaves. Suitable for shade in all states and full sun in all states except Queensland.

Majestic arched broad foliage

Emerald Arch is a wide leaf native Flax Lily with low water requirements. It is best suited to cooler or temperate regions also doing well in South Eastern Queensland, given some Summer irrigation and shade. Emerald Arch tolerates heavy shade to full sun.
