

# Isabella<sup>®</sup>

Liriope muscari 'LIRF' 

Isabella has a distinctive display of showy pink flowers throughout the top of the foliage in Summer.

Compared to the standard Liriope muscari, Isabella really stands out due to its denser, more compact fine leaf foliage.

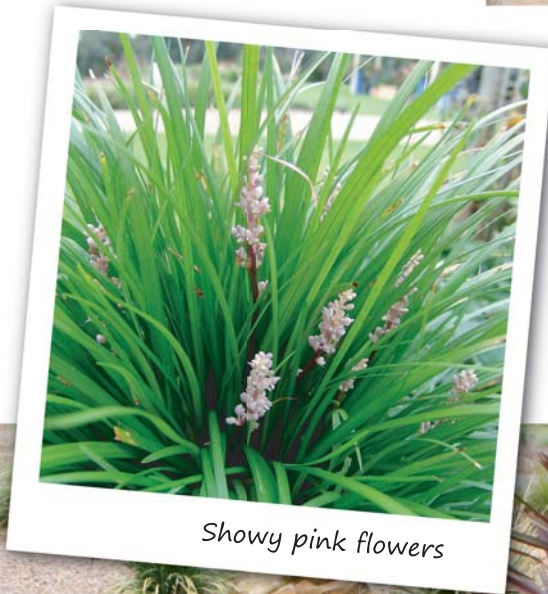

Isabella is a low growing ground cover Liriope.

Planted at 15 per square metre it will form a dense ground cover within a year.

Simply mow or trim in Winter to keep it looking great all year.

*Spreading ground cover Liriope*

*Showy pink flowers*

Isabella is drought and frost tolerant. It can tolerate occasional wet feet and is good for sunny/shady positions. In very cold parts of Australia such as Canberra and Horsham, annual trimming may be required as Isabella can significantly discolour in Winter. Isabella has extreme cold tolerance and can cope with almost all cold areas of Australia. It also has good humidity tolerance for the tropics.

FOLIAGE  
FIRST  
RANGE

DESCRIPTION	Fine leaf with pink flowers
HEIGHT & WIDTH	40cm x 50cm
POSITION	Full sun to heavy shade
CARE	Cut back to ground level in late Winter in colder areas
USES	Great dense ground cover. For cold and hot humid climates
SOIL TYPE	All soil types
