

# Sweet Mist<sup>®</sup>

Phormium tenax 'PHOS2' 

Sweet Mist is an ultra compact Phormium, with an exceptional bronze colour.

Sweet Mist is an excellent plant for VIC, SA, WA, Tasmania and southern NSW. In humid areas, such as Sydney. Plant any time from March to September for best results. One of the most compact, small forms of Phormium. Its beautiful bronze foliage provides stunning contrast in the garden.

Mature Plants

FOLIAGE FIRST RANGE

Sweet Mist is ideal for mass planting as a low border or fill in plant and an excellent choice for contrasting with green foliage. Suited to the smaller modern garden. It is also good for containers and patios. Sweet Mist grows well in full sun to shaded positions, tolerates heavy frost and moderately dry conditions and is suitable for most soil types.

## Great contrast for a modern garden
